Primary Examiner, Art Unit 2833

The following is an examiner's statement of reasons for allowance:

Claims 6-12 are allowed because the prior art of record does not disclose or suggest a band shaped strap comprising a first strand with a buckle and tongue, the buckle including two lateral branches, a bar and a tongue partly engaged on the bar, the first strand having an end orifice arranged transversely for receiving the bar, an end notch in the free end of the first strand for receiving the eyelet part of the tongue, the first strand including a plurality of additional transverse orifices on the strand and an associated elongated hole through the strand and intersecting with the associated orifice, such that the first strand can be shortened by cutting along a transverse section through one of the elongated holes, the transverse orifice associated with this hole for receiving the bar, and the hole becoming a new end notch for receiving the eyelet part of the tongue.

Specifically, the prior art fails to disclose a plurality of transverse orifices along a strap, the orifices intersecting with an elongated hole passing through the strap, and a buckle with a bar and tongue having an eyelet, wherein the strap may be shortened by cutting along one a section passing through one of the holes, such that the new orifice corresponding to the cut section receives the bar, and the new hole receives the eyelet part of the tongue.
